

## Projects

1. You may work with a partner.
2. Pick a topic that utilizes some concept(s) from second year calculus. See the website for some ideas.
3. Write up your research in a brief report. Your audience is the other students in the class.
4. Prepare a presentation (aim for about 20 minutes), in which you can introduce the application, show your results, and do an example.
5. Assign a problem to your classmates based on the material in your presentation and report.
6. Attempt to entertain as well as educate. Come up with original stories, characters, or pictures to illustrate your ideas.
7. Include your written report, as well as all other projects' questions with answers in your final portfolio.
8. This will be weighed in as a checkpoint grade, as well as impact your participation grade for this class.
